**Forecast FY 2021**

Hurricane Irma made landfall in Collier County on Sunday, September 10, 2017.

In FY 2018, a \$36,707,700 loan was given to Solid Waste Capital Fund 474 to help cash-flow the vegetative debris pickup and processing; funding was provided by deferring approximately \$28.1 million in capital projects with the balance coming from reserves. In July 2018, the Solid Waste Division received one FEMA reimbursement which allowed for a partial loan repayment of \$2,845,400 in FY 2019. (Accrued interest of \$364,142.35 was assessed on the loan in FY18).

In FY 2019, Solid Waste Capital Fund 474 received a \$40.2 million payment from FEMA and a partial loan repayment of \$27,509,772.03 was made, restoring funding to capital projects which were deferred. The total Advance/Repayment from Solid Waste Capital Fund 474 was \$30,355,172.03. (Accrued interest of \$593,335.65 was assessed in FY19). The outstanding balance of the loan is \$7,310,005.97.

In FY 2020, the Advance/Repayment from Solid Waste Capital Fund 474 in the amount of \$364,200 is accrued interest (as of Sept 30, 2018) for the use of the \$36,707,700 loan. (Accrued interest of \$94,735.33 was assessed in FY20). The outstanding balance of the loan is \$7,040,541.03.

In FY 2021, the Advance/Repayment from Solid Waste Capital Fund 474 of \$7,160,000 is the repayment of the balance of the loan plus any accrued interest that will be assessed in FY21.

In FY 2022, the Advance/Repayment from Solid Waste Capital Fund 474 of \$110,000 was setup incase the FY2021 budget is not sufficient to payoff the remaining loan of \$7,040,541.03 plus interest.

**Collier County Government**  
**Fiscal Year 2022 Adopted Budget - Capital Improvement Program**

**Capital Improvement Program**  
**County Water/Sewer Capital Funded by Revenue Bonds (415)**

**Mission Statement**

The following water and wastewater capital projects are funded by bond proceeds.

**Notes**

On December 12, 2017, the Board of County Commissioners (Board) adopted Resolution No. 2017-243 creating the Cassena Road Potable Water MSBU to assess and collect assessments for the construction of potable water facilities. Included in this Resolution was a provision for an internal loan from Fund (111) to facilitate timely completion and minimize costs. The initial year of the five (5) year assessment was FY 19. The final year is scheduled to be FY 23.

**Collier County Government**  
**Fiscal Year 2022 Adopted Budget - Capital Improvement Program**

**Capital Improvement Program**  
**Solid Waste Capital Improvements (474)**

**Mission Statement**

Solid waste capital projects are funded by user fees and support the infrastructure required to maintain the County's integrated solid waste management system and are designed to meet the future needs for Collier County disposal.

**Forecast FY 2021**

Hurricane Irma made landfall in Collier County on Sunday, September 10, 2017, as a Category 4, severely impacting the County.

To cash-flow the vegetative debris pickup and processing, the following transfers were made in FY 18:

\$ 4,000,000 loan from the Water User-Fee Capital Fund 412 deferring \$3 million in capital projects and reducing reserves by \$1 million.

\$36,707,700 loan from the Sewer User-Fee Capital Fund 414 deferring about \$28.1 million in capital projects and reducing reserves by \$8.6 million.

\$ 2,500,000 loan from the Solid Waste Operating Fund 470, reduction in reserves

\$ 3,500,000 loan from the Mandatory Trash Collection Fund 473, reduction in reserves

\$ 7,050,000 deferred Solid Waste capital projects.

\$10,000,000 loan from the General Fund 001. This transfer was not made but remained in the budget incase there was a need for additional cash flow.

On July 16, 2018, the County received its first FEMA reimbursements in the amount of \$9,835,287, the entire amount was for debris.

The loans and accrued interest for the Water (fd 412) and Sewer (fd 414) loans were paid as follows:

In FY 2019, the \$4 million loan from Fund 412 was paid back as well as a partial loan repayment of \$30,355,172 to Fund 414.

In FY 2020, only accrued interest was paid back to the Water & Sewer Capital funds, \$20,000 to Fund 412 and \$364,200 to Fund 414.

In FY 2021, the Advance/Repayment to the Sewer Capital Fund 414 of \$7,160,000 is a loan repayment including accrued interest.

This was partially funded by a \$6.3 million Transfer from Solid Waste Landfill Closure & Debris Mission Reserves Fund 471.

Also in FY 2021, the Advance/Repayment to Water Capital Fund 412 of \$65,000 is for accrued interest.

FY 2022, Advance/Repayment to both Funds 412 & Fund 414 are budgeted for \$2,000 and \$110,000 as a precaution in case the FY 2021 repayments are not sufficient.

**Current FY 2022**

Significant projects underway in FY 2022 include completion of the Deep Injection Well; planning and permitting for the Immokalee property & building improvements; and planning and design for landfill optimization, the Resource Recovery Business Park, and the 305 Parcel.

A transfer from the Solid Waster Landfill Closure Fund 471 has been budgeted for \$8 million. This budget was established to set up the mechanism to transfer over cash from fund 471 incase a storm makes landfall in Collier County. The \$8 million was placed into a Reserve for Disaster Relief.

## **Capital Improvement Program**

### **Airport Capital Fund (496)**

#### Notes

Non-grant funded capital projects will be tracked within Fund 496. Grant related projects and their required local match components are programmed within Funds 498 and 499, respectively.

#### Current FY 2022

The \$670,000 transfer from the Airport Operations Fund 495 is budgeted to fund FY22 capital projects and establish a reserve for future grant match requirements.

**Collier County Government**  
**Fiscal Year 2022 Adopted Budget - Capital Improvement Program**

**Capital Improvement Program**  
**Airport Grants (498/499)**

**Mission Statement**

To account for the funds received from federal and state grants supporting capital projects at each airport location.

**Notes**

Upon receipt, new grant programs are brought before the Board of County Commissioners for approval and acceptance. At that time, budgets are added to the financial accounting and grant management system.

**Collier County Government**  
**Fiscal Year 2022 Adopted Budget - Capital Improvement Program**

**Capital Improvement Program**  
**TDC Capital Projects Fund (758)**

**Mission Statement**

To manage TDT supported capital projects including the portion of the 5th penny of Tourist Development Tax earmarked for Sports & Special Events Complex capital improvements and debt service.

**Capital Improvement Program**  
**TDC Capital Projects Fund (758)**

**Notes**

On July 11, 2017 the Board approved increasing the Tourist Development Tax (TDT) from 4% to 5% as well as distribution adjustments among Tourist Tax supported funds. The County's Sports & Special Events Complex is funded by a portion (71.4%) of the added 5th percent. Proceeds from Collier County Tourist Development Tax Revenue Bonds, Series 2018 were used to construct the facility.

**Forecast FY 2021**

An annual TDT tax distribution to this fund supports debt service for the Paradise Coast Sports & Events Complex Bond shown as a transfer to Fund (270). Additionally, the forecast includes a transfer of \$2,724,400 to Fund (370) supporting a portion of Sports and Events Complex Phase 2 construction.

**Current FY 2022**

A transfer of \$2,471,200 to Fund (370) for construction funding for the Paradise Coast Sports and Events Complex is provided in addition to a transfer to Tourist Development Tax Revenue Bond Fund (270).

**Revenues**

This fund is supported by an allocation of 71.4% of the 5th penny of the Tourist Development Tax. The TDT budget amount is \$4,262,600 which is approximately 19.5% higher than the prior year.

| 50211                             | <b>Pelican Bay Ops. Buildings</b><br>Since 1974, the former Pelican Bay Independent District, now Pelican Bay Services Division, has performed the duties of its maintenance operation out of the utility site located on Watergate Way inside the Pelican Bay community. As the operation and responsibilities have expanded over the past 40 years, and the building has reached the end of its service life, the Unit plans to replace the existing building and facilities for maximal efficiency purposes. In addition to replacement of the existing office and maintenance garage, the project will include the design and construction of new chemical and soil storage buildings, pole barn for housing large and tall equipment, fueling facility, and nursery. The site will be improved after demolition and prior to construction to address the water management issues as required by FEMA. | 1,451,200          |
| 51026                             | <b>Pelican Bay Lake Bank Enhance</b><br>The lake bank restoration project will include different water management lakes. The work involves stripping the existing banks and regrading to the proper slopes. Fill will be dredged from the lakes or imported to restore grade conditions. The banks will be restored and stabilized with a combination of sod turf, reinforced geo-webbing, turf mat, rock rip rap or similar engineered materials. Wood or vinyl bulkhead wall may be used if applicable. Littoral plantings may be used to stabilize banks below the water level and to encourage nutrient uptake and wildlife foraging. The lake restoration project will improve and enhance the lake aesthetics, safety, and the long-term function of the community's water management system.                                                                                                        | 1,267,300          |
| 51100                             | <b>Clam Bay Restoration</b><br>Biological, tidal and hydrological, and water quality monitoring of the Clam Bay system. Includes mangrove monitoring, recreational facilities monitoring, hand-dug channel monitoring, water level monitoring, exotic and nuisance vegetation monitoring and maintenance, coastal scrub and cabbage palm monitoring, protected species monitoring, tide gauges station maintenance, and an annual management report.                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 178,600            |

A typical expenditure of this type is an impact fee studies.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <b>60,000</b>      |
| <b>31385</b>                         | <b>Operating Project 385</b><br>Operating category funding for the Law Enforcement Impact Fee Fund (385) is required for expenses not specifically part of a capital project. A typical expenditure of this type is an impact fee studies.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <b>20,000</b>      |
| <b>50217</b>                         | <b>Helicopter Replacement</b><br>The Sheriff's Office is requesting funding to replace an aging helicopter. The current aircraft recently had some unexpected component failures, plus the age and high flight time are the reason for the request. The amount requested is \$8 million and is needed as soon as possible, however a three-year funding plan will be acceptable.<br><br>The acquisition of a utility helicopter would provide the Sheriff's Office with a critical asset needed to provide essential services to the community particularly search and rescue operations offshore and in the Everglades. A new modern aircraft would greatly expand mission capabilities providing increased airspeed and longer flight times. The ability of operate Instrument Flight Rules (IFR) certified aircraft equipped with autopilot systems will greatly reduce fatigue during patrol operations, and enhance safety when operating during poor weather conditions. A new aircraft would increase lifting capability and room for fully equipped teams. | <b>5,000,000</b>   |
| <b>50229</b>                         | <b>J1-J2-J3 Roof Replacement</b><br>Replacement, recoating, engineering, and design of J1-J2-J3 roofs (Sheriff's buildings). The replaced roofs will protect the County asset from any rainfall and destructive hurricanes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <b>5,000,000</b>   |

| <b>59001</b>                      | <b>Driveway Turn-Around Program</b><br><br>Purpose: Reinforce and widen residential driveways where hammerhead construction is not feasible. These reinforced driveways will allow solid waste franchise trucks to turn around in a safe manner. The reinforced driveways are also used by ambulances, fire trucks, and school buses. Method: Competitive construction bid process. End State: Improve public safety by providing turn-around capabilities on public roads for solid waste collection vehicles so that the vehicles do not have to back out of dead-end streets.                                                                                                                                                                                                                                                                                                                                                                                          | <b>250,000</b>     |
| <b>59003</b>                      | <b>Recycling Center Technical Support</b><br><br>Purpose: Optimize the operating efficiency and increase the safety of facility operations by upgrading and modernizing the existing recycling drop-off centers. Planned projects include improving access roadways, repair buildings and upgrade sites. Method: Fixed-term services contracts and/or competitive construction bids. End State: Upgraded recycling centers that will ensure safety for employees and customers, provide environmental protection for residents, and further extend the life of the landfill by diverting recyclable and hazardous materials from the landfill.                                                                                                                                                                                                                                                                                                                            | <b>50,000</b>      |
| <b>59005</b>                      | <b>Landfill Technical Support</b><br><br>Purpose: Upgrade the county-owned facilities at the Collier County Landfill and the Immokalee Transfer Station to better serve customers and enhance site safety. Method: Fixed-term services contracts and/or competitive construction bids. End State: Improved county facilities that will better serve the residential and commercial customers that utilize the landfill.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <b>400,000</b>     |
| <b>59012</b>                      | <b>Expansion of Landfill</b><br><br>Purpose: Maximize existing facilities and assets through expansion of the Collier County Landfill in compliance with the Integrated Solid Waste Management Strategy and the Solid Waste Sub-Element (Policy 2.4). The program includes engaging the services of qualified engineering consultants to develop options, assessment and feasibility studies for increasing landfill disposal capacity through southern, eastern or western expansion at the existing Collier County Landfill property and/or surrounding properties; provide funding to purchase property, mitigation credits and mitigation property to optimize landfill capabilities. Method: Fixed-term contracts will be used for studies and design as well as mitigation purchases. End State: Extend the life of the Collier County Landfill by maximizing the use of the existing landfill site providing disposal capacity for the citizens of Collier County. | <b>250,000</b>     |
| <b>70101</b>                      | <b>Compliance Assurance Program</b><br><br>Purpose: Upgrade compliance-related systems at the Collier County Landfill and the Immokalee Transfer Station to ensure environmental integrity, sustainability, and compliance with all local, state and federal laws and regulations. The project includes, but is not limited to, an improved leachate management system at the Collier County Landfill as specified in the Solid Waste Sub-Element (Policy 2.2) of the land Development Code and as regulated by (Florida Administrative Code) FAC 62-701.500 Landfill Construction Requirements and FAC 62-701.510 Leachate Monitoring Requirements. Method: Fixed-term contracts and competitive construction bids. End State: A fully compliant landfill program well into the future, meeting all rules, regulations, and future disposal demands as well as community expectations.                                                                                   | <b>75,000</b>      |
| <b>70106</b>                      | <b>Recycling Facilities Projects</b><br><br>Purpose: Optimize the operating efficiency and increase the safety of the facility by completing projects relating to rehabilitation, replacement and optimizations of HVAC (heating, ventilation, air conditioning) systems, roofs, security systems, and other vertical assets existing at the recycling drop-off centers. Also implement a program to enhance the utilization and life cycle expectancy of the recycling drop-off centers by maintaining facilities in satisfactory operating condition by providing systematic inspections and preventative maintenance to avoid failures and disruption of services. Method: Fixed term services contracts and/or competitive construction bids. End State: Enhanced and fully compliant recycling drop-off centers that will ensure site safety and optimize the life of the facility and its vertical assets.                                                          | <b>50,000</b>      |
| <b>70107</b>                      | <b>Landfill Facilities Projects</b><br><br>Purpose: Optimize the operating efficiency and increase the safety of the facility by completing projects relating to rehabilitation, replacement, and optimizations of HVAC (heating, ventilation, air conditioning) systems, roofs, security systems, and other vertical assets existing at the landfill facilities. Also implement a program to enhance the utilization and life expectancy of the landfill facilities by maintaining structures in satisfactory operating condition by providing systematic inspection and preventative maintenance to avoid failures and disruption of services. Method: Fixed term services contracts and/or competitive construction bids. | <b><u>Solid Waste Capital</u></b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                    |
| 70108                             | <b>Immokalee Transfer Station Projects</b><br>Purpose: Optimize the operating efficiency at the Immokalee Transfer Station (ITS) by increasing the safety of the facility by completing projects relating to rehabilitation, replacement and optimization of HVAC (heating, ventilation, air conditioning) systems, roofs, security systems, and other vertical assets. Also implement a program to enhance the utilization and life expectancy of the ITS by maintaining facilities in satisfactory operating condition by providing systematic inspection and preventative maintenance to avoid failures and disruption of services. Method: Fixed term services contracts and/or competitive construction bids. End State: Enhanced and fully compliant recycle drop-off center that will ensure site safety and optimize the life of the facility and its vertical assets.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 25,000             |
| 70219                             | <b>Landfill Leachate Deep Injection Well</b><br>Purpose: To construct a Deep Injection Well (DIW) for long term disposal of leachate. Due to the large volume of leachate generated by the landfill, and potential impact from tropical storms, an improved disposal system is needed. The construction of a DIW will provide long term disposal capacity for the landfill leachate system and provide disposal capacity for various projects development in the Government Operations Business Park. Method: Fixed-term contracts and competitive construction bids. End State: A fully compliant landfill program that will meet all rules, regulations, and future disposal demands as well as community expectations.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 750,000            |
| 70232                             | <b>Immokalee Facility Upgrade HHW</b><br>Purpose: Upgrade the facilities at the Immokalee Transfer Station that are the responsibility of the county to better serve and create a safer environment for the landfill customers. Projects may include 1) Design and permit of Household Hazardous Waste (HHW) collection facilities to provide safe, convenient and environmentally responsible options for area residents and qualified small businesses desiring to properly dispose of flammable liquids, aerosols, pool chemicals, cleaning chemicals, used oil, mercury-containing devices, propane tanks, medical sharps, pharmaceuticals, fluorescent bulbs, batteries, electronics, used paints, pesticides and fungicides to comply with Title 29 of the Code of Federal Regulations, part 1910 Hazardous Materials and Florida Administrative Code Chapter 69A-69 Florida Fire Prevention Code. The recovered household hazardous waste diverts hazardous materials from the landfill which have potential for release into the environment). 2) A new scalehouse with new scales to accommodate the growth in the northeast area of Collier County. 3) Establish a hurricane debris recovery area. 4) General site upgrades include fencing, lighting, and security cameras. FY22 planned projects include construction of a new HHW pavilion and design and permitting of a new scalehouse. Method: Fixed-term services contracts and/or competitive construction bids. End State: Improved county facilities that will better serve the residential and commercial customers that utilize the transfer station while diverting recyclables and hazardous waste material from the landfill. | 1,500,000          |
| 99474                             | <b>X-fers/Reserves/Interest - Fd 474</b><br>Reserve for Contingencies and Reserves for Future Capital Projects are recorded in this project as well as a Transfer from the Solid Waste Landfill Closure & Debris Mission Reserve Fund (471) in the amount of \$8 million. This Transfer will only be made if a catastrophic event happens.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 8,684,200          |

| 33554                            | <b>Restore</b><br><p>This is a large comprehensive watershed improvement initiative currently in a conceptual planning stage. The initiative includes development of a suite of projects to be competed in phases, all with the goal of rehydrating and restoring historic, wet season surface water overland flow principally within the Belle Meade region of Collier County. Project concepts and a multiyear plan have been submitted to the state and the US Department of the Treasury to gain authorization for use of RESTORE Act funds to further the initiative.</p>                                                                                                                                                                                                                                                                  | 1,000,000          |
| 50160                            | <b>Weir Automation</b><br><p>Current projects involving work on several water flow and level control structures (weirs) are in various stages of implementation. "Work" includes planning and design of powered weir gate operations and remote operation capability. All new and rehabilitated weirs with manually adjustable control gates are being considered for this potential future automation upgrade.</p>                                                                                                                                                                                                                                                                                                                                                                                                                             | 750,000            |

| 51029                            | <b>Golden Gate City Outfall Replace</b><br><p>This project includes improvements to the collection, treatment and conveyance of urban stormwater runoff by restoring and upgrading an antiquated system installed in early 1960s within the four-square-mile area known as Golden Gate City (GGC). The GGC canal system flows into Naples Bay via the Main Golden Gate Canal. The project includes replacement and improvements to the existing aging infrastructure such as the removal of old catch basins replaced with ditch bottom inlets with grates to catch debris, the addition of sumps at catch basin locations to act as sediment traps, re-grading and sodding of swales to prevent erosion, and provide water quality improvement. Over a \$50 million program. Individual projects to be delivered as time and budget allow.</p> | 1,000,000          |

| <b>60194</b>                     | <b>Stormwater Maintenance Program</b><br>This project includes funding of various maintenance activities associated with certain existing county stormwater management assets such as the Freedom Park water quality treatment system, Serenity Park's surface water management area, and the Wiggins Pass Road area surface water flow way.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <b>300,000</b>           |
| <b>60195</b>                     | <b>Harbor Lane Brookside</b><br>Harbor Lane is a street in the Brookside neighborhood which needs surface and possibly base refurbishment. The street's stormwater management system has reached the end of its life span and needs reconstruction as well. A new stormwater management system is currently under design. The design includes new culverts and catch basins as well as necessary water quality improvements. The Brookside neighborhood discharges stormwater into Naples Bay, an impaired waterbody. Construction is currently planned for FY 22 pending availability of funds. Contingent upon successful completion of the Harbor Lane improvements, the few remaining streets in the Brookside neighborhood will be considered for future work when funds become available. Vetting of all work within the Brookside HOA is beginning now during the design phase. City of Naples watermain replacement is also being considered as part of this project. | <b>1,000,000</b>         |
| <b>60196</b>                     | <b>Griffin Road Area</b><br>The Griffin Road Area Stormwater Improvement Project is located near the southwestern terminus of Griffin Road in the East Naples area of Collier County off of US41 (Tamiami Trail) and Barefoot Williams Road. The project includes construction of a water quality treatment area on Rookery Bay National Estuarine Research Reserve property. The focus of the project is to provide water quality treatment facilities and an adequate stormwater outfall for the area to reduce frequency of flooding.                                                                                                                                                                                                                                                                                                                                                                                                                                      | <b>500,000</b>           |

| 90096                                                     | <b>Naples Pier Repair and Maintenance</b><br>The City of Naples is paying down "advanced funding" from the pier re-building project through an agreement to not seek additional Category D Pier funding until the advanced funds are recouped. The annual repayment is \$200,000 per year. Pursuant to the September 9, 2014, agreement between Collier County and the City of Naples as amended April 14, 2015, the \$200,000 annual cap on TDC Pier funding was waived and TDC funds in the amount of \$1,464,414 were advanced to support the 2015 re-building of the Naples Pier. Of the \$1,464,414 provided to the City, a credit of \$400,000 was given for FY 14 and FY 15 annual Category D allocations. This credit made the "advance" balance \$1,064,414 going into FY 16. Credits totaling \$1,000,000 were applied between fiscal years 2016 and 2020 leaving a balance due of \$64,414 going into the FY 21 budget. After applying the outstanding advance balance to the FY 21 pier allocation of \$200,000 the City of Naples is eligible for a pier funding disbursement of up to \$135,586. | 200,000            |

| <b><u>Transportation Capital</u></b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                    |
| <b>60129</b>                         | <b>Wilson/Benfield</b><br><br>Wilson Blvd. Extension/Benfield Rd. will provide a north-south arterial road, the need for which was originally identified in the Collier Metropolitan Planning Organization (MPO) 2030 Long Range Transportation Plan approved by the Board of County Commissioners on January 12, 2006.<br><br>The existing CR 951 facility serves as the primary corridor for north-south mobility connecting Marco Island to the northern limit of Collier County at Immokalee Road and is planned to be extended into Lee County and the development of remaining land in Golden Gate Estates and along the corridor will ultimately cause the CR 951 facility to fail, unless options to relieve traffic are developed. This transportation system enhancement (Wilson /Benfield) will help to maintain the adopted roadway level of service to accommodate approved and anticipated development. | <b>1,500,000</b>   |
| <b>60130</b>                         | <b>Wall Barrier Replacement</b><br><br>Replacement of county-maintained noise and barrier walls. This project will replace walls at various locations. Currently, two wall segments are in need of replacement to maintain their functionality and structural integrity: one on Livingston Rd from Radio Rd to Golden Gate Pkwy, and another on Vanderbilt Dr from Goodlette-Frank Rd to Airport-Pulling Rd.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <b>50,000</b>      |
| <b>60131</b>                         | <b>Road Resurfacing</b><br><br>Road Resurfacing: Each year the condition of the county's roads is assessed and a priority system is used to determine which roads have the greatest need for re-surfacing. Overlay work generally involves the milling and removal of some of the existing asphalt. A fresh layer of asphalt is then applied to the roadway, which will also receive new lane markings. The road segments selected are based on an in-depth ranking system that accounts for wear and deterioration.                                                                                                                                                                                                                                                                                                                                                                                                  | <b>9,379,000</b>   |
| <b>60144</b>                         | <b>Oil Well Rd, Everglades to Oil Well Grade</b><br><br>The Oil Well Road (Everglades to Oil Well Grade) project will widen the roadway from 2 lanes to 6 lanes for a distance of 3.38 miles. Lanes will be 12' wide and the project will also include 4' bike lanes and a 10' multi-use path in each direction. A bridge replacement will be required over the Faka Union Canal.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | <b>500,000</b>     |
| <b>60163</b>                         | <b>Traffic Calming/Studies</b><br><br>Traffic studies required to identify specific level of service (LOS) deficiencies and traffic calming.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <b>300,000</b>     |
| <b>60168</b>                         | <b>Vanderbilt Bch Ext, CR951 to Wilson</b><br><br>The initial Vanderbilt Beach Road, Extension Project, consisted of Project 1 – Collier Boulevard to Wilson Boulevard and Project 2 – Wilson Boulevard to Desoto Boulevard. After the delivery of the 60% phase, the projects were put on hold. On December 12, 2017, the Board of County Commissioners approved an amendment to design scope of services and resumed the projects with the limits modified. The combined limits now include Project 1 and portions of Project 2. The Project is to be known as Vanderbilt Beach Road Extension from Collier Boulevard (CR 951) to 16th Street NE. The project consists of approximately 7-mile extension of the existing roadway. 6-lane facility includes on-street bike lanes, sidewalks, and shared-use pathways.                                                                                                | <b>30,500,000</b>  |
| <b>60172</b>                         | <b>Traffic Signals</b><br><br>Transportation traffic signal and roadway lighting improvements, includes upgrades to Traffic Management Center and traffic count equipment. Overseen by the Traffic Operations.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <b>1,429,000</b>   |
| <b>60197</b>                         | <b>Road Maintenance Facility</b><br><br>Funds reserved for construction of road maintenance facility in the north end of town.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <b>195,300</b>     |
| <b>60198</b>                         | <b>Veterans Memorial Road</b><br><br>Building 4-lanes divided urban arterial roadway from the new high school to Old US41, includes railroad crossing, sidewalks, on-street bike lanes and a signal at Old US41 (coordination with FDOT's PD&E study required). Budget for design and right-of-way acquisition in FY22.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <b>4,300,000</b>   |

| <b><u>Transportation Capital</u></b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                    |
| 60226                                | <b>16th Ave (13th St SW to 23rd St SW)</b><br>The project consists of widening the existing traffic lanes to 11' and adding 5' bike lanes on 16th Avenue SW, providing 5' paved shoulders on the approaches at the side street intersections, incidental drainage improvements and school bus stops at each intersection (both sides). This project will enhance connectivity between 23rd Street SW south of White Boulevard to 13th Street SW south of Golden Gate Boulevard.                                                                                                                                                                                                                                                                                         | 1,500,000          |
| 60229                                | <b>Wilson Blvd, GG Blvd to Immokalee</b><br>Widening Wilson Blvd from 2 lanes to 4 lanes urban section, including improvements to the intersection of Wilson Blvd and Golden Gate Blvd.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 1,000,000          |
| 60231                                | <b>Oil Well Rd Shoulder Improvements</b><br>The project consists of widening the converting the existing 10' traffic lanes to 12' lanes and adding 5' paved shoulders on both sides of Oil Well Road – Segment II, east of the Oil Well Rd./Camp Keais Rd. intersection., with incidental drainage improvements. This project will enhance safety on this road.                                                                                                                                                                                                                                                                                                                                                                                                         | 750,000            |
| 60232                                | <b>Belle Meade</b><br>The Belle Meade Natural Resources Conservation Area is the primary watershed for Rookery Bay Estuarine Reserve. The County has identified the Belle Meade area as one of two primary watersheds for implementing mitigation for wildlife and wetland impacts that occur within the Urban Zone of Collier County. This project is being set up to reimburse the Parks and Recreation division for expenses related to the Master Mitigation Preserve Stewardship Reports.                                                                                                                                                                                                                                                                          | 30,000             |
| 60237                                | <b>Everglades Blvd North Shoulders</b><br>Construction of 4' Paved Shoulders on Everglades Boulevard North, from 37th Avenue to Immokalee Road. It includes reconstruction of existing driveways, side drains and swales as necessary.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 750,000            |
| 60240                                | <b>Traffic Calming</b><br>Solutions to reduce traffic speeds and/or cut-through traffic.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 50,000             |
| 60245                                | <b>Logan Blvd N of Imm</b><br>Consultant to conduct a Warrant Analysis and Intersection Control Evaluation (ICE) on Logan Boulevard north of Immokalee Road. It includes three (3) existing intersections at Treeline Drive, Seven Seas Drive and Azalea Drive. It is anticipated that viable alternatives will include traffic signalization and or roundabouts. The consultant shall develop conceptual plans (30%) in preparation for public meetings. Final roadway design of the improvements will follow afterwards. The final roadway design has started for roundabouts at Treeline Drive and Seven Seas Drive based upon input from the residents. The residents at Stonecreek did not desire a roundabout at their entrance. Budget for construction in FY22. | 2,600,000          |
| 60249                                | <b>Vanderbilt Bch Rd, 16th to Everglades</b><br>To construct only two lanes (one in each direction) from 16th Street NE to Everglades.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 8,190,000          |
| 66066                                | <b>Bridge Repairs and Construction</b><br>A Countywide program to maintain the county bridges to acceptable standards in the best interest of health, safety and welfare of the public. All county bridges are inspected by Florida Department of Transportation (FDOT) and rated for Sufficiency and Health Index (SHI). Based on the information in the FDOT bridge inspection reports the bridges are further evaluated and prioritized by need for repair or replacement. These improvements are then identified and budgeted for in the 5-year work program for bridges.                                                                                                                                                                                           | 2,949,500          |
| 68056                                | <b>CR951, GG Blvd to Green Blvd</b><br>Add one lane in each direction; include a roadway alignment shift, access management, a revised signal, bridges, on-street bike lanes, and pedestrian upgrades. Budget for right-of-way acquisition in FY22.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 2,000,000          |

| <b>50105</b>                                 | <b>Integrated Asset Management</b><br><br>Purpose: Sustain the Enterprise-wide Integrated Asset Management Program within the County to more cost-effectively manage assets. The system integrates the Cityworks software application with existing Agency wide systems of GIS (geographic information system), SAP (County's accounting program), SCADA (supervisory control and data acquisition) and many interdivisional processes including procurement and finance spanning five full scale implementation projects. Technical Support will continue into FY22. Method: Utilize fixed-term contracts. End State: A tangible GIS-based asset and work management system to guide predictive and preventative maintenance and consistent sustainable work practices that occur in a systematic manner, at less cost, and with less operational impact versus catastrophic failure. | <b>400,000</b>     |
| <b>50196</b>                                 | <b>Chiller NCWRF Ops BI</b><br><br>Purpose: Replacement of existing heating, ventilation, air conditioning (HVAC) system with the latest in mechanical equipment and technology that will provide the North County Water Reclamation Facility (NCWRF) Operations Building with a more efficient and cost-effective chiller system. Method: Fixed-term contracts and competitive bids. End State: Improve the NCWRF operations building to protect all county employees from heat and high humidity.                                                                                                                                                                                                                                                                                                                                                                                    | <b>100,000</b>     |
| <b>70010</b>                                 | <b>Meter Renewal and Replacement</b><br><br>Purpose: This multi-year program consists of replacing water meters that have reached the end of their useful life. There are over 76,000 meters in the system that record water usage, and are thus the source of revenue for the utility. Scheduled replacement will be modified as needed to remain consistent with the results of the meter audit. This project also replaces meters that have been identified during the meter audit program as being non-compliant. Method: Fixed term contracts for purchases and meter replacement installation completed by staff. End State: Remain in compliance with Florida Administrative Code 62-555, Ordinance 2013-44, and sustain an accurate measurement of customer water usage for accurate billing.                                                                                  | <b>100,000</b>     |
| <b>70019</b>                                 | <b>Cross Connections Program</b><br><br>Purpose: To maintain compliance with Rule 62-555 of the Florida Administrative Code and the Collier County Cross Connection Control Ordinance 2008-32. The rule requires all community water systems to establish and implement a routine cross-connection control program to detect and control cross-connections and prevent backflow of contaminants into the public water supply. Method: Procure the devices through existing contracts and provide installation through a bid process or by staff as determined by the operating department. End State: Fully compliant and protected water supply system.                                                                                                                                                                                                                               | <b>50,000</b>      |
| <b>70023</b>                                 | <b>Fire Hydrant Replacement</b><br><br>Purpose: This on-going program replaces fire hydrants that have reached the end of their useful life. There are approximately 10,000 fire hydrants in the distribution system; existing hydrants are planned to be replaced each year beyond those replaced with water main rehabilitation projects. The areas targeted for replacement will be primarily based on input from the Fire Districts and areas of concern identified during annual flushing exercises. Method: Utilize existing underground services contracts. End State: Replace hydrants to ensure compliance with fire protection codes and ordinances, and provide a point to flush the water distribution system when necessary to comply with state and federal water quality standards.                                                                                     | <b>50,000</b>      |
| <b>70031</b>                                 | <b>Utilities Master Plan</b><br><br>Purpose: Utilize consultants to assist with updates to the Utilities Master Plan, including coordination with the rate study program, and the annual capital improvement program (CIP) update aimed at responsible system growth, maintenance and preservation. Method: Utilization of request for proposal (RFP) and existing fixed term contracts; retain a qualified consultant to prepare and update master plans, rate study collaboration and CIP validation. End State: The Master Plans, CIP and rate study will remain concurrent with the latest population trends concurrent with Growth Management Department Comprehensive Planning guidance and the needs of all Public Utilities Operating Divisions.                                                                                                                               | <b>200,000</b>     |
| <b>70034</b>                                 | <b>Water Plant Structural Rehab</b><br><br>Purpose: Rehabilitate concrete structures at the two Regional Water Treatment Plants (WTPs). Portions of the plants are aging, and their concrete structures have started to exhibit failure. Method: Utilize existing fixed-term contracts for design and construction. End State: Maintain compliance with regulatory requirements and meet demand throughout the water system.                                                                                                                                                                                                                                                                                                                                                                                                                                                           | <b>200,000</b>     |

| <b><u>Water / Sewer District Capital</u></b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                    |
| <b>70045</b>                                 | <b>FDOT Utility Projects-Water</b><br><br>Purpose: Plan, design, and construct Collier County Water-Sewer District (CCWSD) infrastructure driven by Florida Department of Transportation (FDOT) construction projects. Long-range upcoming FDOT projects that require utility relocations include I-75 at CR951 utility relocations due to FDOT Interchange Improvement project. Project activities generally include engineering review, FDOT utility relocation mark-up plans, plan development or deconflicting for various intersection improvements, lighting improvements, traffic signal upgrades and installations throughout the CCWSD service area. Method: Fixed-term contracts and competitive bids or Joint Project Agreements with the FDOT. End State: Coordinated utility construction to maintain compliance and provide reliable services.                                                                                                                                                                                                                                                                                 | <b>25,000</b>      |
| <b>70060</b>                                 | <b>NCWRF SCADA Support Op</b><br><br>Purpose: This is a multi-year program to restore and rehabilitate the Supervisory Control and Data Acquisition (SCADA) systems for the North County Water Reclamation Facility (NCWRF) through a Technical Support Program (TSP) to eliminate obsolescence of existing programmable logic controllers (PLCs) and various instrumentation used to constantly monitor and control the treatment process. This program also implements heightened security measures on stand-alone SCADA systems to prevent accidental or malicious loss through cyber threats such as network intrusion and hacking that could directly impact operations. This program will also provide network hardening through use of fiber installation to remote SCADA locations. This program will increase reliability, sustainability, and operational efficiency. Method: Fixed-term contracts and competitive bids. End State: Maintain compliance and reliability throughout the NCWRF SCADA system.                                                                                                                         | <b>350,000</b>     |

| <b>70062</b>                                 | <b>IQ Systems SCADA TSP Ops</b><br><br>Purpose: This is a multiple year program to restore and rehabilitate and support enhanced telemetry communications and Supervisory Control and Data Acquisition (SCADA) systems through a Technical Support Program (TSP) to eliminate obsolescence of existing programmable logic controllers (PLCs), communication networks and protocol limitations and various pieces of instrumentation used to monitor and control the process. There are 51 PLCs in the Irrigation Quality (IQ) system with an average of 3-5 being replaced per year with a replacement priority based on fiber optic network availability. This program also implements heightened security measures on stand-alone SCADA systems to prevent accidental or malicious loss through cyber threats such as network intrusion and hacking that could directly impact operations. This program will also provide network hardening through use of fiber installation to remote SCADA locations. Method: Fixed-term contracts and competitive bids. End State: Maintain compliance and reliability throughout the IQ SCADA system. | <b>250,000</b>     |
| <b>70069</b>                                 | <b>Well/Plant Power System</b><br><br>Purpose: This multi-year phased project consists of improvement/replacement aging power system equipment and power lines within the wellfields (Tamiami, North Reserve Osmosis & South Reverse Osmosis) and two Regional Water Treatment Plants (WTPs). Planned projects in FY22 focus on electrical reliability improvements at the South County Regional Water Treatment Plant, generator replacements and electrical replacement in the Tamiami wellfield. Method: Utilize existing fixed-term contracts for design and construction. End State: Continue to provide reliability and maintain compliance to meet demand throughout the water system.                                                                                                                                                                                                                                                                                                                                                                                                                                                | <b>1,000,000</b>   |

| <b><u>Water / Sewer District Capital</u></b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                    |
| <b>70071</b>                                 | <b>County-wide Utility Projects-Water</b><br><br>Purpose: Plan, design, and construct Collier County Water-Sewer District (CCWSD) infrastructure driven by intra-county divisions. Project activities generally include: engineering review, plan development or deconflicting for various intersection improvements, lighting improvements, traffic signal upgrades and installations throughout the CCWSD service area. Method: Fixed-term contracts and competitive bids or Joint Project Agreements with the Growth Management Division. End State: Interdivisional coordination with utility construction projects to maintain compliance and provide reliable services with minimal impact to the community.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | <b>15,000</b>      |
| <b>70084</b>                                 | <b>Wellfield SCADA Support - Operating</b><br><br>Purpose: Rehabilitate the Supervisory Control and Data Acquisition systems (SCADA) for the remote water sites including water distribution sites, water quality locations, and wellfields that supply raw water to the north and south treatment plants through a multi-year technical support program to increase reliability and operational efficiency. This program is needed to eliminate obsolescence of existing programmable logic controllers (PLCs) and various instrumentation used to constantly monitor and control the process and communicate with the regional water treatment plants. This program also implements heightened security measures on stand-alone SCADA systems to prevent accidental or malicious loss through cyber threats such as network intrusion and hacking that could directly impact operations. This program will also provide network hardening through use of fiber installation to remote SCADA locations. There are 102 well sites with 72 PLCs and communication networks throughout the wellfield as well as water distribution and quality monitoring sites throughout the water distribution system. This program will upgrade communication methods to more consistent and reliable standards. Planned projects in FY22 focus on communication and control hardware in the North and South Hawthorne and Tamiami wellfields as well as the water distribution and water quality sites.. Method: Through fixed-term contracts and competitive bids. End State: Maintain compliance and reliability throughout the wellfield SCADA system. | <b>200,000</b>     |
| <b>70085</b>                                 | <b>Wellfield/Raw W Booster TSP - Ops</b><br><br>Purpose: Provide annual technical support program (TSP) funding for repairs and modifications needed to meet demand and to remain in compliance. Projects include ongoing restoration and rehab to maintain water (W) production capabilities at 102 individual production wells (reconditioning of wells, well pump replacement, casing and tubing replacement, metering, electrical and mechanical rehab); within the 41 miles of raw water piping system (valve and main rehab, air release valve installation)); and at both raw water booster pump stations (pump and control rehab, building maintenance). Projects for FY22 include reconditioning of existing wells, replacement of existing motor control centers (MCC's) in the Tamiami wellfield and various process improvements. Method: Fixed-term contracts and competitive bids. End State: Meet demand and remain in compliance, maintain production capabilities and reliability.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <b>1,500,000</b>   |
| <b>70102</b>                                 | <b>SCRWTP SCADA Support - Ops</b><br><br>Purpose: Restore and rehabilitate the Supervisory Control and Data Acquisition (SCADA) systems for the South County Regional Water Treatment Plant (SCRWTP) through a multi-year technical support program. This program is needed to eliminate obsolescence of existing programmable logic controllers (PLCs) and various instrumentation used to constantly monitor and control the many processes and communicate throughout the water treatment plant. This program also implements heightened security measures on stand-alone SCADA systems to prevent accidental or malicious loss through cyber threats such as network intrusion and hacking that could directly impact operations. This program will increase reliable, sustainability, and operational efficiency. Method: Through fixed-term contracts and competitive bids. End State: Maintain compliance and reliable operations.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <b>200,000</b>     |
| <b>70104</b>                                 | <b>Water Plant Compliance Assurance Proj</b><br><br>Purpose: This Compliance Assurance Project (CAP) provides needed process improvements at both the South and North County Regional Water Treatment Plant (SCRWTP & NCRWTP) to remain in compliance with local, state or federal regulations. Method: Utilize fixed-term contracts or request for proposal (RFP) for design and study services for the various projects. Bid for construction in conformance with County Purchasing Policy. End State: Maintain compliance and meeting demand throughout the water system.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <b>200,000</b>     |

| <b><u>Water / Sewer District Capital</u></b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                    |
| <b>70109</b>                                 | <b>Lime Treatment TSP</b><br><br>Purpose: A technical support program (TSP) to design and construct improvements to the lime softening treatment process at the South County Regional Water Treatment Plant utilizing technology improvements that have occurred since the initial plant design in the early 1980's.<br>Method: Through fixed-term contracts and competitive bids. End State: Meet demand and remain in compliance, achieve energy efficiency, and maintain reliability.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <b>300,000</b>     |
| <b>70113</b>                                 | <b>Facility Infrastructure Maintenance</b><br><br>Purpose: Operational and preventative maintenance program which performs regular preventative maintenance and minor repairs on water facilities including inspections and assessments of roofs, gates, overhead doors, cranes, fences, HVAC (heating ventilation, air conditioning) site, and landscaping. This will enhance the utilization and life expectancy of the water facilities by maintaining structures in satisfactory operating condition by providing systematic inspections and preventative maintenance to avoid failures and disruption of services. Method: Fixed term services contracts and/or competitive construction bids. End State: An enhanced and fully compliant water department that will extend the life expectancy of the facility and its vertical assets.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <b>300,000</b>     |
| <b>70114</b>                                 | <b>Infrastructure TSP Field Ops - Water</b><br><br>Purpose: A technical support program (TSP) to optimize the operating efficiency and increase the safety of the Public Utility Operations Center (PUOC) and Collier County wellfield structures by completing projects relating to rehabilitation, replacements, renovation and optimizations of building spaces, HVAC (heating, ventilation, air conditioning) Systems, roofs, electrical and fire systems, fences, gates and other vertical assets existing in the PUOC and Public Utilities Wellfield. This will enhance the utilization and life cycle expectancy of the PUOC and wellfield by maintaining structures in satisfactory operating condition by providing systematic inspection, detection, and correction of incipient failures either before they occur or before they develop into major defects. Planned FY22 projects include fencing in the wellfield, HVAC upgrades, roof replacements and stucco replacement at the PUOC. Method: Fixed term services contracts and/or competitive construction bids. Method: Fixed term services contracts and/or competitive construction bids. End State: An enhanced and fully compliant PUOC and wellfield that will ensure safety for employees, and extend the life cycle of the facility and its vertical assets. | <b>150,000</b>     |
| <b>70117</b>                                 | <b>Wastewater Remote Sites TSP</b><br><br>Purpose: A technical support program (TSP) to optimize the operating efficiency and ensure the safety of Public Utilities Department (PUD) Wastewater structures by completing projects related to the rehabilitation, replacement, and optimizations of HVAC (heating, ventilation, air conditioning) Systems, roofs, electrical and fire systems, and other vertical assets existing in the Collections, Irrigation Quality and Master Pump Station Facilities (IQ/MPS). Implement a program to enhance the utilization and life expectancy of the IQ/MPS by maintaining facilities in satisfactory operating condition by providing systematic inspections and preventative maintenance to avoid failures and disruption of services. Planned FY22 projects include but not limited to sitework improvements to the Pelican Bay general storage and IQ maintenance building. Method: Fixed term services contracts and/or competitive construction bids. End State: An enhanced and fully compliant IQ/MPS that will ensure safety for employees and extend the life cycle of the facility and its vertical assets.                                                                                                                                                                     | <b>700,000</b>     |
| <b>70118</b>                                 | <b>Infrastructure TSP Water Plants</b><br><br>Purpose: A technical support program (TSP) to optimize the operating efficiency and increase the safety of the Water Plants by completing maintenance projects related to rehabilitation, replacements, and optimizations of HVAC (heating, ventilation, air conditioning) systems, roofs, lighting systems, electrical and fire systems, and other vertical assets existing at the South and North County Regional Water Treatment Plant (SCRWTP & NCRWTP). This will enhance the utilization and life cycle expectancy of the SCRWTP and NCRWTP. Planned FY22 projects include HVAC replacement for Motor Control Center (MCC) room, crane replacement at NCRWTP and new roof for the Reverse Osmosis building at SCRWTP. Method: Fixed term services contracts and/or competitive construction bids. End State: An enhanced and fully compliant SCRWTP and NCRWTP that will ensure safety for employees, and extend the life cycle of the Plants and its vertical assets.                                                                                                                                                                                                                                                                                                           | <b>1,050,000</b>   |

| <b><u>Water / Sewer District Capital</u></b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                    |
| <b>70119</b>                                 | <b>WW Treatment Plants TSP</b><br>Purpose: A technical support program (TSP) which performs operational and preventative maintenance on wastewater (WW) facilities including inspections of roofs, gates, garage doors, fences, HVAC (heating, ventilation, air conditioning), site and fire sprinklers. FY22 planned projects include enclosing Wastewater lab area and asphalt overlay at South County Water Reclamation Facility (SCWRF), re-roof at electric service building and renovation of reuse building at North County Water Reclamation Facility (NCWRF). Method: Fixed term services contracts and/or competitive construction bids. End State: An enhanced and fully compliant waste water department that will extend the life cycle of the facility and its vertical assets.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <b>750,000</b>     |
| <b>70120</b>                                 | <b>Naples Park Basin Optimization</b><br>Purpose: A multi-year program (FY 2017-28) that provides replacement of water distribution asbestos-cement (AC) pipe and wastewater clay pipe in Naples Park that has reached the end of its useful life. The program installs fire hydrants, water mains and other appurtenances that improve fire protection and water quality in coordination with stormwater replacements (funded out of Stormwater Capital Funds 325 & 328). Replacement rate is approximately 2 to 4 miles per year depending on budget availability. FY22 funds construction on 98th/99th or 105th/106th Avenues North and design of the next two avenues. Method: Utilize request for proposal (RFP) for design and competitive bidding for installation. End State: Sustain compliance and meet demand with reliability through continued proactive maintenance as well as concurrent replacement of the water distribution and stormwater system assets.                                                                                                                                                                                                                                                                                                                                                           | <b>9,900,000</b>   |
| <b>70131</b>                                 | <b>Large Meters Renewal &amp; Replacement</b><br>Purpose: Remove and replace 20 large meters as part of a multi-year program to replace water meters that have reached the end of their useful life. There are approximately 600 large meters in the system that record water usage, and are thus the source of revenue for the utility. All meters three inch and larger are tested and calibrated annually with replacements scheduled on a rotating basis. In general, this project replaces large water meters that have reached the end of their useful life, and meters that have been identified during the meter audit program as being non-compliant. Method: Fixed term contracts for purchases and replacements with a portion of installation by staff. End State: Remain in compliance with Florida Administrative Code 62-555, Ordinance 201-73, and sustain an accurate measurement of customer water usage for accurate billing.                                                                                                                                                                                                                                                                                                                                                                                      | <b>150,000</b>     |
| <b>70136</b>                                 | <b>Water Plant Capital Projects</b><br>Purpose: Provide funding for capital improvements involving safety related projects, repairs, replacements, and modifications needed to meet demand and to remain in compliance at the Regional Water Treatment Plant (WTP's). These facilities have been producing over 10 billion gallons of treated water annually. The major pieces of equipment needed to be kept operational are cartridge filters, transfer/blend pumps, high service pumps, treatment skids (Reverse Osmosis & Nano), degasification towers, odor control trains, ground storage tanks (GST), generator sets, lime reactors, media filters, sludge thickener and belt press. This is a multi-year program that addresses ongoing prioritized needs. Method: Fixed-term contracts for design services and competitive bids for construction. End State: Meet demand, maintain reliability, ensure safety of plant staff, and remain in compliance.                                                                                                                                                                                                                                                                                                                                                                      | <b>100,000</b>     |
| <b>70148</b>                                 | <b>Water Reclamation Facilities TSP-Ops</b><br>Purpose: This is a multi-year Technical Support Program (TSP) to provide repairs and modifications needed to meet demand and remain in compliance at the North and South County Water Reclamation Facilities (NCWRF and SCWRF). These facilities treat approximately 6 billion gallons of wastewater per year. The various treatment processes Modified Ludzack-Ettinger (MLE) and Orbal produce high quality Irrigation Quality (IQ) water. The major pieces of equipment that need to be kept operational include the pretreatment structure with bar screens, grit removal mechanisms and influent channels, MLE aeration basins, orbal oxidation ditches, clarifiers, effluent filters, and disinfection chambers. There are also mechanical screens and grit chambers, odor control units, blowers, pumps, valves, flow meters, chemical analyzers, chemical storage/distribution systems, IQ water storage ponds, sludge belt presses, and sludge holding tanks. Project provides for repair, rehabilitation and/or replacement of assets near the end of their useful lives. Method: Budget amendments to discrete projects, fixed-term contracts, and competitive bids. End State: Maintain compliance, meet demand, achieve energy efficiencies, and maintain sustainability. | <b>5,000,000</b>   |

| <b><u>Water / Sewer District Capital</u></b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                    |
| <b>70166</b>                                 | <b>IQ Water System TSP-Ops</b><br><br>Purpose: This is a multi-year Technical Support Program (TSP) to restore, rehabilitate and maintain infrastructure of the Irrigation Quality (IQ) water system needed to meet customer demand, and contractual and regulatory compliance, including the rehabilitation of IQ pump stations, isolation valves, and air release valves, as well as meters, pumps, and motors. This program allows operations to accurately measure water sold, ensuring accurate revenue generation; delivers water to the customer per contractual agreements; and allows for system isolation for regulatory compliance. As the reclaimed water system is more than 20 years old, these projects are necessary to maintain the distribution system in working condition. FY22 projects include but are not limited to: flow meter and valve replacement, point of delivery equipment installations, and pump replacement. Method: Fixed-term contracts and competitive bids. End State: Remain in contractual and regulatory compliance, meet customer demand, and improve system efficiency. | <b>750,000</b>     |
| <b>70167</b>                                 | <b>Government Ops Business Park</b><br><br>Purpose: To design, permit and construct a centrally located, industrial or commercial zoned, replacement facility for the Water & Wastewater Division Operations group and well as Facilities Management Division, Transportation, and Sheriff's Forensic/Evidence facility. Method: The new facility will contain administrative offices, repair workshops, generator storage/testing facilities, centralized warehouse, SCADA (supervisory control and data acquisition) operations center, SCADA (supervisory control and data acquisition) operations center, SCADA Tower facility, employee common areas (locker rooms, break rooms, work spaces), equipment storage, employee and county vehicle parking. End State: To meet current compliance and vertical standards.                                                                                                                                                                                                                                                                                           | <b>790,000</b>     |
| <b>70173</b>                                 | <b>Orange Tree Compliance</b><br><br>Purpose: A multi-year Technical Support Program (TSP) that provides repair of aging utility system assets that have failed throughout the former Orangetree Utility service area. Method: Utilize existing fixed-term underground contracts or competitive bidding for installation and fixed-term engineering services contracts for design. End State: Sustain compliance and meet demand with reliability through continued proactive maintenance and replacement of the potable water and wastewater system assets.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <b>500,000</b>     |
| <b>70185</b>                                 | <b>YMCA Rd AC Water Main Replace</b><br><br>Purpose: This project is part of a multiyear program that addresses the abandonment and/or removal of asbestos cement (AC) pipe in the County's distribution system. This project will install a new PVC (polyvinyl chloride) water main and remove the existing AC water main feeding the YMCA facility in the vicinity of Airport Pulling Road and Pine Ridge Road. Method: Fixed-term contracts and competitive bids. End State: Meet demand, remain in compliance and maintain reliability and safety.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <b>300,000</b>     |
| <b>70194</b>                                 | <b>NE Water &amp; Wastewater Plants</b><br><br>Purpose: To support growth in the Northeast (NE) region of Collier County by providing water, wastewater and irrigation quality water services to new developments and to provide reliability to existing customers. This project install a 1 - 3 MGD (million gallons per day) interim water treatment plant, two ground storage tanks and extensive piping. Method: Phased construction utilizing existing design-build contract. End state: Maintain compliance and meet demand throughout the water system.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <b>1,000,000</b>   |
| <b>70197</b>                                 | <b>Old Lely AC Pipe Rehab</b><br><br>Purpose: A multi-year program (FY2022-30) that provides replacement of water distribution asbestos-cement (AC) pipe in Old Lely that has reached the end of its useful life. The program installs fire hydrants, water mains and other appurtenances that improve fire protection and water quality. Method: Utilize RFPs (Request for Proposals) for design and competitive bidding for installation. End State: Sustain compliance and meet demand with reliability through continued proactive maintenance and replacement of the water distribution system assets.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <b>200,000</b>     |
| <b>70202</b>                                 | <b>Collier County Utility Standards</b><br><br>Purpose: Utilize design consultants to provide independent peer review of specific Collier County Water-Sewer District infrastructure detail drawings based on input and feedback from County staff and advisory committees. The Board of County Commissioners annually approves the Utility Standards Manual update. Method: Meet with the Utilities Discussion Group and Public Utilities Operating Divisions to update the Utility Standards Manual. End State: That the Utility Standards Manual, as the Public Utilities principal technical guidance document, ensures that all utility-related construction meets county standards, that consistency is maintained, and that the utility continues to stay compliant with all state and federal regulations.                                                                                                                                                                                                                                                                                                  | <b>30,000</b>      |

| 70225                                        | <b>Cassena Rd MSBU</b><br>Purpose: Design and construct a potable water line in the right-of-way to be accessible to each of thirteen unserved properties on Cassena Rd. via an Municipal Service Benefit Unit (MSBU) agreement. Method: Fixed-term contract. End State: Meet customer demand by providing a fully functional potable water line, complete with water meter and backflow preventer, to each of the thirteen properties on Cassena Rd.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 69,300             |
| 70240                                        | <b>Collections Operating TSP</b><br>Purpose: This is a multi-year Technical Support Program (TSP) to restore, rehabilitate and maintain infrastructure of the wastewater collection (WWC) system needed to meet customer demand, and contractual and regulatory compliance, including the rehabilitation of WWC pump stations, isolation valves, air release valves, meters, pumps, and motors. This program allows operations to improve and maintain the WWC system assets for purposes of reliability, redundancy, and regulatory compliance. As the wastewater collection system is more than 60 years old, these projects are necessary to maintain the collection system in a reliable working condition. Project needs for FY22 may include, but are not limited to: Rehabilitation of pump stations 305.01, 305.12, 305.18, 309.02 and 309.16; rehabilitation of force mains and power systems. Method: Fixed-term contracts and competitive bids. End State: Remain in contractual and regulatory compliance, meet customer demand, and improve system efficiency. | 1,500,000          |
| 70244                                        | <b>Vanberbilt Bch Rd - Utility Relocate</b><br>Purpose: This project consists of the relocation of the existing raw water mains, Supervisory Control And Data Acquisition) SCADA lines, potable water main and installing a new water main to the proposed future schools, county park on Vanderbilt Beach Road (VBR) Extension and a new water main on Massey Street to complete water main looping in this area. All utility work is within the proposed right of way of the VBR Extension roadway project that Growth Management Department – Transportation Engineering is completing. Method: Utilize request for professional services (RPS) for design and competitive bidding for construction. End State: Meet demand, maintain reliability, and remain in compliance.                                                                                                                                                                                                                                                                                             | 2,500,000          |
| 70248                                        | <b>US41 East WM Replace</b><br>Purpose: Replace a water main (WM) along US 41 East that is buried too deep for repairs to be feasible. Method: Utilize fixed term contracts for design services and competitive bidding for construction. End State: Sustain compliance and meet demand with reliability through continued proactive maintenance and replacement of the water distribution system assets.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 3,000,000          |
| 70258                                        | <b>NCRWTP Degasifiers Modifications</b><br>Purpose: The project involves the existing degasifier units located at the North County Regional Water Treatment Plant (NCRWTP). This project will address the turbidity that is being generated at the startup of the degasification process that is being detected in the finished water. Method: Fixed term contracts for design services and competitive bids for construction. End State: Provides improvement to the finished water quality, meets demand, maintain reliability, and remain in compliance.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 500,000            |
| 70272                                        | <b>Air Release Valve Replace</b><br>Purpose: Replace and bring above ground approximately 75 air release valves (ARVs) per year. Existing below-ground ARVs are more prone to failure creating sanitary sewer overflows, and well as being a safety issue working in confined spaces. Method: Fixed term contracts for design and construction. End State: Maintain compliance and provide reliable services.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 2,250,000          |
| 70273                                        | <b>Generator Replacement</b><br>(Water) Purpose: Replace the existing generators with Tier 4 generators at the North County Regional Water Treatment Plant (NCRWTP). Design will be completed in FY 22 and construction will be completed in a future fiscal year. Method: Fixed term contracts for design services and construction. End State: Renewed asset life and permit compliance.<br><br>(Wastewater) Purpose: Purchase approximately 10 portable diesel generators per year to be deployed during power outages to prevent sanitary sewer overflows. Method: State of Florida Sheriff's Contract. End State: Maintain compliance and provide reliable services.                                                                                                                                                                                                                                                                                                                                                                                                   | 850,000            |

| <b><u>Water / Sewer District Capital</u></b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                    |
| <b>70275</b>                                 | <b>Naples Manor WM Replace (Carlton &amp; CATT)</b><br><br>Purpose: Replace water distribution asbestos-cement (AC) pipe in Naples Manor that has reached the end of its useful life. The project installs fire hydrants, water mains (WM) and other appurtenances that improve fire protection and water quality. Method: Utilize fixed term contracts for design services and competitive bidding for construction. End State: Sustain compliance and meet demand with reliability through continued proactive maintenance and replacement of the water distribution system assets.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | <b>1,500,000</b>   |
| <b>70276</b>                                 | <b>Goodland PS Improvements</b><br><br>Purpose: The project involves the Goodland Pump Station (PS) located at Goodland Drive and San Marco Road. This project will replace all yard piping and valves. The underground assets need to be replaced due to saltwater deterioration. Verify if any pumps, piping, mechanical, electrical, Supervisory Control And Data Acquisition (SCADA) assets need to be replaced and/or upgraded to current pump station standards. Evaluate the structural integrity of the existing building and ground storage tank (GST). Renovations to the pump building & GST along with other miscellaneous items within the pump station site that need to be replaced. Method: Fixed term contracts for design services and competitive bids for construction or utilizing the Design-Build procurement method. End State: Provides improvement to the water quality, continues to meet demand, continues to provide fire protection, and increases water reliability.                                                                                                                                                                                                                                                                  | <b>5,300,000</b>   |
| <b>70277</b>                                 | <b>NCRWTP Nano Skids &amp; Pump Replace</b><br><br>Purpose: Replace the existing feed pumps and motors for the nano skids at the North County Regional Water Treatment Plant (NCRWTP). Method: Fixed term contracts for design services and construction. End State: Renewed asset life and permit compliance.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <b>1,600,000</b>   |
| <b>71009</b>                                 | <b>Security Upgrades</b><br><br>Purpose: Multi-year program to provide both physical and virtual protection of assets of our critical infrastructure that are imbedded in critical compliance-driven operations, including physical access points such as gates, fences, card access and recording devices, as well as cyber threats such as network intrusion and cyber hacking that could directly impact operations. Evaluate and prioritize mitigation to resolve risk and exposure to maintain compliance with Department of Homeland Security requirements for public water supply systems and sustainability of existing levels of service. Planned FY22 projects include but not limited to a new guard house at North County Regional Water Treatment Plant (NCRWTP), and the replacement of perimeter fencing at the South and North County Regional Water Treatment Plants (SCRWTP and NCRWTP). Method: Internal resources and fixed-term contracts. End State: Compliant and secure infrastructure.                                                                                                                                                                                                                                                      | <b>450,000</b>     |
| <b>71010</b>                                 | <b>Water Distribution System TSP</b><br><br>Purpose: A multi-year technical support program (TSP) that provides repair of aging water distribution system assets that have failed throughout the installed of approximately 960 miles of water piping. Projects in FY22 include small water main projects and un-planned/emergency water projects. Method: Budget amendments to discrete projects, utilize existing fixed-term underground contracts or competitive bidding for installation and fixed-term engineering services contracts for design. End State: Sustain compliance and meet demand with reliability through continued proactive maintenance and replacement of the water distribution system assets.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <b>1,025,000</b>   |
| <b>71055</b>                                 | <b>NCRWTP SCADA Support Ops</b><br><br>Purpose: Restore and rehabilitate the supervisory control and data acquisition (SCADA) systems for the North County Regional Water Treatment Plant (NCRWTP) through a multi-year technical support program. This program eliminates obsolescence of existing programmable logic controllers (PLCs), and various instrumentation used to monitor and control plant processes and communicate throughout the plant. Includes the modernization of existing instrumentation to utilize standard protocols in support of asset management initiatives, as well as enhancing communication networks and related hardware. This program also implements heightened security measures on stand-alone SCADA systems to prevent accidental or malicious loss through cyber threats such as network intrusion and hacking that could directly impact operations. This program will also provide network hardening through use of fiber installation to remote SCADA locations. Primary focus of the instrumentation and communications enhancements will be on critical treatment processes. Method: Through fixed-term contracts and competitive bids. End State: Maintain compliance and reliable operation of the treatment process. | <b>150,000</b>     |

| <b>71056</b>                                 | <b>SCADA Compliance - Water</b><br><br>Purpose: Multi-year program to acquire, manage and maintain software applications, licenses and support agreements for Supervisory Control and Data Acquisition (SCADA) systems used throughout the Water Division. This program will also include research and development projects to continue to develop the SCADA system and ensure reliability as technology changes. Method: Utilize fixed-term contracts and competitive bids. End State: All critical control systems are maintained, compliant and secure to facilitate continued production of quality products.                                                                                                                                                                                                                                                                                                                                                                                                       | <b>75,000</b>      |
| <b>71058</b>                                 | <b>General Legal Services</b><br><br>Purpose: Obtain expert legal counsel for water, wastewater, and reuse issues. Provide appropriate legal representation for various complex or specialized water and wastewater related matters to stay in compliance. Method: Issue work orders under a competitive agreement for legal services for complex or specialized legal tasks. End State: Provide appropriate legal representation for various complex or specialized water and wastewater related matters to stay in compliance.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <b>50,000</b>      |
| <b>71063</b>                                 | <b>Water Plant-Variable Frequency Drives</b><br><br>Purpose: Systematically replace obsolete variable frequency drives (VFDs) at the Water Plants and secondary stations. Working on the VFD replacements at the South County Regional Water Treatment Plant (SCRWTP). There are 29 VFDs at the SCRWTP. At the end of FY 21, there will be 26 VFDs replaced. For FY22, three VFD replacements will be completed. At the end of FY22, all VFD's will have been replaced at the SCRWTP. Method: Utilize fixed-term contracts and competitive bids. End State: Meet demand and remain in compliance, achieve energy efficiencies, and maintain reliability.                                                                                                                                                                                                                                                                                                                                                                | <b>275,000</b>     |
| <b>71065</b>                                 | <b>SCRWTP TSP Operating</b><br><br>Purpose: Provide annual technical support program (TSP) funding for safety related projects, repairs and modifications needed to meet demand and to remain in compliance at the South County Regional Water Treatment Plant (SCRWTP). This facility has been producing approximately 5 billion gallons of treated water annually. The major pieces of equipment needed to be kept operational are: 8 cartridge filters, 5 transfer/blend pumps, 10 high service pumps, 10 treatment skids, 8 degasification towers, 4 odor control trains, 6 generator sets, 3 lime reactors, 6 media filters, sludge thickener and belt press. Projects planned for FY22 include replacing Mag Meters at deep injection wells, Aqueous CO2 improvements. This is a multi-year program that addresses ongoing prioritized needs. Method: Fixed-term contracts for design and competitive bids. End State: Meet demand, maintain reliability, ensure safety of plant staff, and remain in compliance. | <b>600,000</b>     |
| <b>71066</b>                                 | <b>NCRWTP TSP Operating</b><br><br>Purpose: Provide annual technical support program (TSP) funding for safety related projects, repairs and modifications needed to meet demand and to remain in compliance at the North County Regional Water Treatment Plant (NCRWTP). This facility has been producing approximately 4 billion gallons of treated water annually. The major pieces of equipment needed to be kept operational are: 8 cartridge filters, 6 transfer pumps, 6 high service pumps, 10 treatment skids, 3 concentrate wet well pumps, 4 degasification and odor control trains, and 4 generator sets. Projects in FY22 include, but are not limited to, chemical bulk tank replacement. Method: Fixed-term contracts for design and competitive bids. End State: Meet demand, maintain reliability, ensure safety of plant staff, and remain in compliance.                                                                                                                                              | <b>600,000</b>     |
| <b>71067</b>                                 | <b>Distribution Repump Station TSP</b><br><br>Purpose: This is a multi-year program that addresses prioritized needs. It provides annual technical support program (TSP) funding for repairs and modifications to the secondary water distribution stations to meet demand and to remain in compliance. These stations include the following booster stations and storage tanks: Carica, Manatee, Isles of Capri, Raw Water Booster Pump Station (RWBPS), and Goodland. FY22 projects include completing small projects at the pump stations. Method: Fixed-term contracts for design services and competitive bids for construction. End State: Meet demand, remain in compliance and maintain reliability and safety.                                                                                                                                                                                                                                                                                                 | <b>200,000</b>     |

| <b><u>Water / Sewer District Capital</u></b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                    |
| <b>72009</b>                                 | <b>Western Interconnect</b><br><br>Purpose: Construction of a western wastewater interconnect is needed to manage growth in the south service area and to allow the maintenance of existing force mains. A series of force mains and pump station improvements will move flows from the south service area to the north service area where there is more available capacity. Remaining work includes approximately three miles of force main from Orange Blossom Drive to Immokalee Road, two miles of force main from MPS 309 to Radio Road and an interconnect booster pump station. Method: Design-Build RPS. End State: The ability to reliably shift wastewater from the south to north service areas while remaining in compliance and meeting demand.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <b>5,367,000</b>   |
| <b>72013</b>                                 | <b>Facility Infrastructure Maintenance - WW</b><br><br>Purpose: To optimize the operating efficiency and ensure the safety of the Wastewater (WW) Plants by completing maintenance service projects (MSP) related to the rehabilitation, replacements, and optimizations of HVAC (heating, ventilation, air conditioning) Systems, roofs, electrical and fire systems and other vertical assets existing at the South and North County Water Reclamation Facilities (SCWRF and NCWRF), Orangetree and Golden Gate Wastewater Facility. This will enhance the utilization and life expectancy of the SCWRF and NCWRF by maintaining the Plants in satisfactory operating condition by providing systematic inspections and preventative maintenance to avoid failures and disruption of services. Planned FY22 projects include preventive maintenance inspections of Wastewater Plant assets, HVAC replacement, roof replacements and light-emitting diode (LED) lighting at both Wastewater Plants. Method: Fixed term services contracts and/or competitive construction bids. End State: An enhanced and fully compliant SCWRF and NCWRF that will ensure safety for employees and extend the life cycle of the Plants and its vertical assets. | <b>250,000</b>     |
| <b>72505</b>                                 | <b>Wastewater Security Systems</b><br><br>Purpose: This is a multi-year program to provide both physical and virtual assessments of assets of our critical infrastructure that are imbedded in critical compliance-driven operations, including physical access points such as gates, fences, card access and recording devices, as well as cyber threats such as network intrusion and cyber hacking that could directly impact operations. Evaluate and prioritize mitigation to resolve risk and exposure to maintain compliance with Department of Homeland Security requirements and sustainability of existing levels of service. Planned FY22 projects include but not limited to the installation of gates, replacement and addition of cameras, and perimeter fencing at both the South and North County Water Reclamation Facilities (SCWRF and NCWRF). Method: Internal resources and through fixed-term contracts. End State: Compliant and secure infrastructure.                                                                                                                                                                                                                                                                     | <b>1,300,000</b>   |
| <b>72541</b>                                 | <b>SCADA Compliance - WW</b><br><br>Purpose: This is a multi-year program to acquire, manage and maintain software applications, licenses and support agreements for Supervisory Control and Data Acquisition (SCADA) systems used throughout the Wastewater (WW) Department. This program will also include research and development projects to continue to develop the SCADA system and ensure reliability as technology changes. Method: Utilize fixed-term contracts and competitive bids. End State: All critical control systems are maintained, compliant and secure to facilitate continued production of quality products.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <b>50,000</b>      |
| <b>73045</b>                                 | <b>FDOT Utility Projects-WW</b><br><br>Purpose: Plan, design, and construct Collier County Water-Sewer District infrastructure driven by Florida Department of Transportation (FDOT) construction projects. Projects requiring engineering review, plan development or minor construction include: various intersection improvements, lighting improvements, traffic signal upgrades and installations throughout our service area. In FY22, a \$775,242 escrow payment to FDOT is required for utility relocations performed by FDOT in conjunction with the I-75/951 Interchange Improvements Project. Method: Fixed-term contracts and competitive bids or Joint Project Agreements with the FDOT. End State: Coordinated utility construction to maintain compliance and provide reliable services.                                                                                                                                                                                                                                                                                                                                                                                                                                            | <b>700,000</b>     |

| <b><u>Water / Sewer District Capital</u></b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                    |
| <b>73922</b>                                 | <b>WW Collections SCADA/Telemetry</b><br><br>Purpose: This is a multi-year program to restore and rehabilitate the Supervisory Control and Data Acquisition (SCADA) systems for the Collections System through a Technical Support Program (TSP) to ensure compliance and provide operational control. SCADA upgrades are being implemented to control variable frequency drives (VFDs) within the wastewater (WW) collection system. The program includes repair and replacement of SCADA equipment including transmitter control units (TCUs) and antennas at more than 800 pump stations, and storm-hardening of the central SCADA systems at the Wastewater Collections office on Shirley Street, and providing a resilient mission critical system that maintains compliance of the entire county's wastewater infrastructure. This program also implements heightened security measures on stand-alone SCADA systems to prevent accidental or malicious loss through cyber threats such as network intrusion and hacking that could directly impact operations. This program will also provide network hardening through use of fiber installation to remote SCADA locations. Method: Fixed-term contracts and competitive bids. End State: Maintain compliance and reliability throughout the Collections SCADA system. | <b>300,000</b>     |
| <b>75005</b>                                 | <b>Wellfield Management Program</b><br><br>Purpose: This is a multi-year program that will be needed throughout the life of the wells which provides consultant engineering support to assist in the monitoring of the aquifer conditions in the existing wellfields (the Tamiami, the North Reverse Osmosis, and the South Reverse Osmosis, with a total of 102 production wells and 24 monitoring wells in the system), and planning for future wellfields. This program aids with the review of regulatory changes to water withdrawal permits, regulatory reporting, permit modification and renewal, and hydrogeological expertise and support. The Wellfield Management Program also provides engineering design for necessary repairs and rehab projects to maintain a reliable and sustainable raw water supply. Method: Through the existing wellfield contract. End State: Ensure sustainable aquifer yield while planning for future system demand.                                                                                                                                                                                                                                                                                                                                                                 | <b>100,000</b>     |
| <b>75017</b>                                 | <b>Hydraulic Modeling</b><br><br>Purpose: Provide hydraulic evaluation and analysis of all water, wastewater and irrigation quality water infrastructure. Hydraulic models are used to verify availability for Planned Unit Developments, concurrency, and master planning. Models are also used by operations to predict pressures, flow rates, and water quality under varying conditions. These data points are essential for determining the appropriate emergency response in the event of pipe breakage. Flows can be modeled and redirected with minimum disruption to the community. Hydraulic analysis will identify opportunities for cost-savings resulting from pump station operations, diurnal curve management, pressure management, and pipe sizing. For FY22, continue to model future scenarios for new water projects. Method: Fixed-term contracts. End State: Maintained compliance and operations through this current year execution of a multi-year program.                                                                                                                                                                                                                                                                                                                                           | <b>200,000</b>     |
| <b>75018</b>                                 | <b>Financial Services</b><br><br>Purpose: Utilize outside consultants to prepare feasibility reports, perform rate studies, asset valuations, and acquisitions. Method: Utilize a financial consultant to perform these required studies. The external consultants are utilized in situations where an independent perspective is required or specialized financial analysis is needed. End State: Provide independent financial assessments to aid in business decision-making.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <b>60,000</b>      |
| <b>75019</b>                                 | <b>GM Comprehensive Plan</b><br><br>Purpose: Utilize consultants to assist in addressing growth management (GM) changes to key documents and data used to prepare the following: the Utilities portion of the Annual Update and Inventory Report (AUIR), updates to the Growth Management Plan (GMP), Evaluation and Appraisal Report (EAR) of the Growth Management Plan, and updates to the Land Development Code (LDC) to ensure sustained compliance within the Collier County Water-Sewer District. Method: Engage consultants to provide professional services. End State: The AUIR, Evaluation and Appraisal Report of the Growth Management Plan, and updates to the Land Development Code and Growth Management Plan will be forwarded to Growth Management Division's Comprehensive Planning Section for coordination of the approval process through the Board of County Commissioners.                                                                                                                                                                                                                                                                                                                                                                                                                             | <b>105,000</b>     |

**Collier County Government**  
**Fiscal Year 2022 Fund Budget Summary**

## General Fund (001)

Fund Type: **General Fund**

Description: **The General Fund (001) is the largest operating fund of the County. It is used to account for all countywide general government activities and is supported principally by ad valorem taxes. The Constitutional Officer Funds, which are sub-funds of the General Fund, include the Clerk of Courts (011), Sheriff (040), Property Appraiser (060), Tax Collector (070), and Supervisor of Elections (080).**

**Fiscal Year 2022 Fund Budget Summary**

## Stormwater Operations (103)

Fund Type: **Special Revenue**

Description: **In FY19, Stormwater operations were centralized into Fund 103 and capital in Fund 325. In FY 19, the Board desired to fund-up the Stormwater operations and capital to the maximum allowed under Ordinance 2010-137, an amount not to exceed the equivalent of 0.15 mills. The Stormwater Division is responsible for the management of facilities and services for drainage and flood protection for existing and future development, minimize the degradation of quality of receiving water and surrounding natural areas, and protect the functions of natural groundwater aquifer recharge areas. The principal funding source is a subsidy from the General Fund (001) and the Unincorporated General Fund (111).**

**Collier County Government**  
**Fiscal Year 2022 Fund Budget Summary**

## Grant Program Support (123)

Fund Type: **Special Revenue**

Description: **This fund is used to provide assistance to elderly Collier County residents through excess revenues from the Senior Choice federal and state grant program as well as any local funds needed to support unfunded or underfunded mandates. On November 10, 2020, agenda item 11.A, the Board approved to reimburse EMS (\$13,464,802.10) and the Sheriff (\$31 million) for public health and safety payrolls thru December 30, 2020 from the CARES Act CRF (Coronavirus Relief Funds). These reimbursements recovered using this methodology were transferred from the General Fund (001) and the Board approved 'Collier CARES' program beyond the December 31, 2020 funding deadline.**

## Court Maintenance Fund (181)

Fund Type: **Special Revenue**

Description: **This fund accounts for the revenue specifically created to fund State Court Facilities. On July 28, 2009, the Board amended Ordinance 04-43 (with Ordinance 09-41) by increasing the surcharge imposed for non-criminal traffic infractions set forth in Chapter 318, Florida Statutes, and those offenses enumerated in Section 318.17, Florida Statutes, from \$15 to \$30 per Section 318.18(13), Florida Statutes.**

**Collier County Government**  
**Fiscal Year 2022 Fund Budget Summary**

## 800 MHz Intergovernmental Radio Communication Program (188)

Fund Type: **Special Revenue**

Description: **Provides funding for operating and maintenance costs of the 800 MHz radio system. Revenue is generated from a \$12.50 surcharge on moving traffic violations. A transfer from the General Fund is required to fully fund the operational costs for the 800 MHz radio system.**

**Collier County Government**  
**Fiscal Year 2022 Fund Budget Summary**

## Gas Tax Revenue Refunding Bonds, Series 2003/2012 & 2005/2014 (212)

Fund Type: **Debt Service**

Description: **The Gas Tax Revenue Bonds, Series 2012 refunded the 2003 Road Improvement Refunding Revenue Bonds. Gas Tax Revenue Bonds, Series 2014 partially refunded the 2005 Gas Tax Revenue Bonds. Both the Series 2003 and Series 2005 Bonds provided funding for acquisition, construction, and reconstruction of roads and bridges and other transportation improvements. Revenues pledged include the 5-cent, 6-cent, 7th cent and 9th cent Gas Taxes with final maturity in June 2025. The County Seventh Cent Gas Tax is deposited directly into the Gas Tax Debt Service Fund (212) and the remaining funding is a transfer from the Gas Tax Construction Fund (313).**

**Fiscal Year 2022 Fund Budget Summary**

## Boater Improvement (303)

Fund Type: **Capital Projects**

Description: **This fund accounts for fees collected through annual boaters' registrations (Section 328.72(15) and 328.66(1), Florida Statutes). There are two fees imposed; one is a state imposed fee and the other is a county imposed registration fee. Monies are used for maintaining waterways, as well as building and repairing public boat ramps and docks, removing derelict vessels, and maintaining waterway markers.**

## ATV Settlement (305)

Fund Type: **Capital Projects**

Description: **Accounts for settlement moneys received June 20, 2011. Collier County and the South Florida Water Management District entered into a Settlement Agreement wherein the SFWMD paid Collier County \$3 million to dispose of litigation arising out of a 2003 Agreement between the parties in which the District was to convey 640 acres to Collier County for recreational ATV use. On December 10, 2013, agenda item 11.G., the Board approved segregating the remaining settlement moneys into its own fund (305) so interest earnings may accumulate and be held for ATV riding purposes.**

## Park CIP Bond (308)

Fund Type: **Capital Projects**

Description: **To segregate and accurately account for bond proceeds and related interest earnings. In September 2020, the Board of County Commissioners issued Special Obligation Revenue Bonds, Series 2020A, to finance stormwater capital improvements (\$60 million) and aquatic and other park related improvements (\$20 million) and to refinance commercial paper (\$10 million). This fund was created to track the \$20 million related to Parks capital improvements.**

**Collier County Government**  
**Fiscal Year 2022 Fund Budget Summary**

## Infrastructure Sales Tax (1 Penny) Capital (318)

Fund Type: **Capital Projects**

Description: **This fund accounts for the Local Option Infrastructure Sales Surtax. This surtax was approved by the voters to enhance safety, mobility, and hurricane preparedness in Collier County and its cities. The collection of the one-cent sales surtax started on January 1, 2019 and sunset on December 31st of any year in the event that the total aggregate (includes cities) distributions of the surtax proceeds equal or exceed \$490,000,000 or on December 31, 2025.**

## Stormwater CIP Bond (327)

Fund Type: **Capital Projects**

Description: **To segregate and accurately account for bond proceeds and related interest earnings. In September 2020, the Board of County Commissioners issued Special Obligation Revenue Bonds, Series 2020A, to finance stormwater capital improvements (\$60 million) and aquatic and other park related improvements (\$20 million) and to refinance commercial paper (\$10 million). This fund was created to track the \$60 million related to Stormwater capital improvements.**

**Collier County Government**  
**Fiscal Year 2022 Fund Budget Summary**

## Road Impact Fee - District 1, North Naples (331)

Fund Type: **Capital Projects**

Description: **Collier County's Transportation Impact Fee was originally adopted in January 1985, to assist the County in providing adequate transportation facilities for expected growth. Impact fees are collected on new building construction by districts and are segregated into individual funds. Impact fees are expended on projects in the impact fee district or within an adjoining district in which they were collected.**

**Fiscal Year 2022 Fund Budget Summary**

## Road Impact Fee - District 6, Golden Gate Estates (338)

Fund Type: **Capital Projects**

Description: **Collier County's Transportation Impact Fee was originally adopted in January 1985, to assist the County in providing adequate transportation facilities for expected growth. Impact fees are collected on new building construction by districts and are segregated into individual funds. Impact fees are expended on projects in the impact fee district or within an adjoining district in which they were collected.**

## Regional Park Impact Fee - Incorporated Areas (345)

Fund Type: **Capital Projects**

Description: **Collier County's Regional Park Impact Fee was originally adopted in December 1988, to assist the County to pay for growth-related regional parks land and facilities. Impact fees are assessed and collected on residential new building construction permits. Today, this fund only holds the cities impact fee deposits. The unincorporated area's regional impact fees are deposited into fund 346.**

**Collier County Government**  
**Fiscal Year 2022 Fund Budget Summary**

## Community & Regional Parks Impact Fee - Unincorporated Area (346)

Fund Type: **Capital Projects**

Description: **Collier County's "Community Park Impact Fee" and "Regional Parks Impact Fee" Ordinances were repealed and replaced with the "Community & Regional Parks Impact Fee - Unincorporated Area" in May 1999, to continue to assist the County to pay for growth-related parks facilities. Impact fees are assessed and collected on residential new building construction permits.**

## Crime Prevention Trust Fund (603)

Fund Type: **Special Revenue**

Description: **Pursuant to Florida Statute 775.083, court costs shall be assessed and collected in each instance a defendant pleads nolo contendere to, or is convicted of, or adjudicated delinquent for, a felony, a misdemeanor, or a criminal traffic offense under state law, or a violation of any municipal or county ordinance if the violation constitutes a misdemeanor under state law. The court costs imposed is \$50 for a felony and \$20 for any other offense. The county, in consultation with the sheriff, must expend such funds for crime prevention programs in the county, including safe neighborhood programs under ss. 163.501-163.523 F.S.**

## Deposit Fund (670)

Fund Type: **Permanent Fund**

Description: **Fund 670 is the depository for all County surety and subdivision improvement bonds. The County occasionally is required to access these bonds to pay for improvements not completed by developers in accordance with County codes or local PUD agreements. Fund would be transferred from Fund 670 to the appropriate County operating fund where improvement expense would be paid.**

## Appendix to the Collier County Adopted Budget Fiscal Year 2021-2022

The following pages comprise the appendix to the Collier County Adopted Budget for the Fiscal Year 2021-2022. The appendix consists of the following components:

|                                    |         |
|------------------------------------|---------|
| Glossary of Commonly Used Terms    | Page 2  |
| Glossary of Commonly Used Acronyms | Page 7  |
| Statistical Data*                  | Page 10 |

\*The Collier County Comprehensive Annual Financial Report (CAFR) is prepared each year by the Clerk of Courts Financial Office, independent of the County Office of Management and Budget. The CAFR for Fiscal Year 2020-2021 cannot be considered final until it is presented to the Board of County Commissioners; this is not expected to take place until March 2022. As such, the statistical data from the CAFR for the Fiscal Year 2019-2020 has been included.

## Glossary of Commonly Used Terms

**2007 State of Florida Property Tax Limiting Legislation:** Refers to the June 2007 Legislation enacted by the Florida Legislature which requires local governments to reduce ad valorem taxes to below the level of taxes levied in fiscal year 2006-2007 based upon certain formulas proffered by the legislation.

**2008 State of Florida Property Tax Limiting Legislation:** This one-time legislation required the Roll-Back Millage Rate to include the impact of Amendment 1.

### -A-

**Accrual Basis:** The recording of the financial effects on a government of transactions and other events and circumstances that have cash consequences for the government in the periods in which those transactions, events or circumstances occur, rather than only in the periods in which cash is received or paid by the government.

**Adopted Budget:** The budget as approved by the Board of County Commissioners after two public hearings prior to the beginning of each new fiscal year.

**Ad Valorem Tax:** A tax based on the value of real or tangible personal property.

**Agency:** A major governmental branch. The County Manager and Constitutional Officers serve as agency heads.

**Aggregate Millage Rate:** A "theoretical" millage rate based on the total County taxable value required to raise all County levied taxes, including dependent districts and Municipal Service Taxing Districts (MSTDs), but not including voter approved debt issues.

**Amendment 1 (State-wide voter referendum on January 29, 2008):** Provided an extra \$25,000 Homestead Exemption; a \$25,000 exemption on tangible personal property; and, provided for transportability of "Save-Our-Homes" legislation which limits increases in taxable value to 3% annually.

**Appropriation:** An authorization by the Board of County Commissioners to spend public funds for a specific purpose.

**Appropriation Unit:** A major category of expenditures such as personal services, operating expenses, capital outlay, transfers, contributions and reserves.

**Article V:** The portion of the Florida Constitution that covers funding for the judicial system.

**Arbitrage:** In government finance, the most common occurrence of arbitrage involves the investment of the proceeds from the sale of tax-exempt securities in a taxable money market instrument that yields a higher rate, resulting in interest revenue in excess of interest costs. If bond proceeds are not expended in accordance with spend down requirements the excess interest earnings (arbitrage) must be rebated to the Internal Revenue Service.

**Arbitrage Services:** Services provided by the County's Arbitrage consultant designed to monitor the expenditure of capital bond proceeds in a timely manner to determine whether there were excess interest earnings in accordance with Internal Revenue Service regulations.

**Assessed Valuation:** The value placed on a given property by the Property Appraiser. State law requires that the assessed value be equal to the market value of the property.

**Audit:** The examination or inspection of various books of accounts by an auditor followed by physical checking of inventory.

### -B-

**Balanced Budget:** A budget in which revenues equal expenditures.

**Board of County Commissioners (BCC):** The legislative body of county government, which in Collier County consists of, five Commissioners elected by district.

**Bond:** A certificate of debt issued by a government or corporation guaranteeing payment of the original investment plus interest by a specified future date.

**Budget:** A summary of planned revenues and expenditures for a given period of time. The County is required to prepare and adopt a budget each fiscal year.

**Collier County Government**  
**Fiscal Year 2022 Adopted Budget**

**Budget Highlights:** Explanations of changes or major issues affecting the budget.

**Budget Amendment:** A change to the fiscal year adopted budget, which may increase or decrease a fund total. A budget may be amended during the fiscal year by the governing body and/or management, in accordance with procedures specified by law and/or administrative rules and regulations.

**-C-**

**Capital Improvement:** The new construction of, or improvements to existing buildings, roads or other long-lived facilities.

**Capital Improvement Element (CIE):** The section of the state mandated Growth Management Plan which includes a plan for the construction of various public facilities needed to maintain a given service level for the expected population of the County over the next five years.

**Capital Lease:** Contractual agreements which are termed "leases", but which in substance amount to purchase contracts for equipment and machinery.

**Capital Outlay:** Appropriation unit that includes all expenditures for equipment, vehicles, machinery, etc. that has a cost of \$1,000 or greater.

**Capitalization:** The process of converting capital fixed assets from expenses to assets.

**Carry Forward:** (Fund Balance) Unspent money at the end of a fiscal year available for use in the next fiscal year to fund expenditures or reserves.

**Commercial Paper:** A competitive short-term loan-financing alternative issued at a variable interest rate. Commercial paper generally offers low cost borrowing, flexible terms and repayment schedules, and a more simplified application process than other instruments used to finance capital and other governmental projects.

**Community Redevelopment Agency (CRA) Bank Loan:** Specialized competitive bank financing benefiting the County's Bayshore/ Gateway CRA with loan proceeds used for private land acquisition purposes within the District.

**Constitutional Officers:** Independently elected county officials mandated by the Florida Constitution. These include the Property Appraiser, Tax Collector,

Supervisor of Elections, Sheriff and Clerk of the Court.

**Contingency Reserve:** Money set aside for emergencies or other unforeseen, unbudgeted expenditures.

**Contract Agencies:** Independent organizations, primarily social service agencies, which have a contract with the County to provide services to County residents in return for receiving some funding from the County.

**Contributions:** A grant provided by the County to another government or non-profit agency which provides services to Collier County residents.

**Current Service:** An existing program or service. The current service budget is the amount necessary to continue to provide existing programs.

**-D-**

**Debt Service:** Payment of interest, principal and other associated costs to County creditors.

**Deficit:** The excess of expenditures over revenues during a fiscal year.

**Department:** The basic organizational unit of the County, which provides a specific service.

**Depreciation:** Expiration in the service life of fixed assets attributable to wear and tear, deterioration, action of physical elements, inadequacy and obsolescence.

**Division:** An organizational unit composed of departments that are responsible for a major governmental function.

**-E-**

**Enterprise Fund:** A fund established to account for activities operated in a manner similar to a private business enterprise. The County's Utility Division and Solid Waste Department operations are accounted for in this way.

**Expanded Service:** A new program or an enhancement to an existing program. The expanded service budget includes the costs to provide new services and enhancements to existing services approved by the BCC.

**Expenditure:** Money spent to receive a good or service.

**Collier County Government**  
**Fiscal Year 2022 Adopted Budget**

**-F-**

**Fiduciary Funds:** Trust or Agency funds that account for assets held by the County as a trustee or agent for individuals, private organizations and other governmental units.

**Fiscal Year:** A 12-month period used to plan for the use of an organization's funds. By state law, the County's fiscal year runs from October 1 through September 30 of the following year.

**Fixed Asset:** Assets of a long-term character such as land, buildings, and improvements other than buildings, machinery, equipment and furniture whose cost is in excess of a specific amount and whose life expectancy is in excess of one year.

**Full-Time Equivalent (FTE):** The number of approved positions equated to a full-time basis (e.g., two half-time positions equal one full-time equivalent position).

**Fund:** A financial unit used to account for activities of a similar purpose or with a common revenue source.

**Fund Balance:** (Carry Forward). A fund's current assets less current liabilities at fiscal year end. In governmental funds, this is also equal to revenues less expenses for the fiscal year.

**-G-**

**General Fund:** The fund that accounts for most county-wide general government activities and is supported by ad valorem taxes.

**General Long Term Debt:** The long term debt associated with a governmental type fund. Long term debt legally payable from general revenues and backed by the full faith and credit of a governmental unit.

**General Obligation Bonds:** Bonded indebtedness relying on the general credit worthiness of the issuing government for repayment rather than a specific revenue source pledged for repayment.

**Goals:** Written statements that reflect the broad, general purpose of a program.

**Governmental Fund:** A broad category of funds used to account for general government operations. The General Fund, Special Revenue Funds, Capital

Funds and Debt Service Funds are all types of Governmental Funds.

**Grant:** A contribution of assets (usually cash) by one governmental unit or other organization to another. Typically, these contributions are made to local governments for a specified purpose by the state or federal government.

**-H-**

**Homestead Exemption:** A deduction of up to \$25,000 from the assessed value of property occupied by the owner and designated as his primary residence.

**-I-**

**Impact Fees:** Fees assessed during the construction process that are used to offset the costs of providing growth related infrastructure.

**Indirect Service Charge:** Charging for services based on a cost allocation method rather than billing as service is rendered. The County uses an indirect service charge to reimburse the General Fund for general and administrative services provided to other funds.

**Infrastructure:** The basic facilities required for the functioning of a community such as roads, bridges, water and sewer service, etc.

**Internal Service Fund:** A fund used to account for operations providing goods or services primarily to other government departments on a reimbursement basis.

**-J-**

**Job Bank Employee:** Pool of temporary pre-qualified employees maintained by the County and available for hire by various County Divisions, Agencies and Constitutional Offices.

**-L-**

**Levy:** To impose a tax, special assessment or charge.

**Line Item Budget:** A budget that lists each expenditure category (salary, materials, contractual services, etc.) separately, along with the dollar amount budgeted for each specified category.

**-M-**

**Collier County Government**  
**Fiscal Year 2022 Adopted Budget**

**Major Fund:** A major fund is defined as those funds whose revenues, expenditures/expenses, assets or liabilities are at least 10 percent of the total for their fund category (governmental or enterprise) and 5 percent of the aggregate of all governmental and enterprise funds in total.

**Mandate:** Any action or responsibility required by law or so ordered by a court.

**Mill:** One thousandth of one dollar. One tenth of one cent.

**Millage Neutral:** A budget prepared with a General Fund millage rate equal to the rate in the prior year adopted budget.

**Millage Rate:** The amount of ad valorem tax, expressed in mills, to be paid on each dollar of a property's taxable value.

**Modified Accrual:** A governmental fund – type measurement focus whereby revenues and other financial resources are recognized when they become susceptible to accrual, i.e. when they become both measurable and available to finance expenditures of the current period. Available means collectible in the current period or soon enough thereafter to be used to pay liabilities of the current period. Expenditures are recognized when the fund liability is incurred.

**Municipal Service Taxing District (MSTD):** A district established to provide a service typically found in a city or town to an area outside city limits (unincorporated area).

**MSTD General Fund:** The Special Revenue Fund that accounts for municipal type services in the unincorporated areas of Collier County, which is supported principally by ad valorem taxes. Services provided through this fund include Growth Planning, Parks and Recreation, Law Enforcement, and Zoning and Building Code Enforcement.

-O-

**Object Code:** A numerical code identifying a basic revenue or expense account (line item).

**Objectives:** Specific items to be accomplished in the short term (year).

**Ombudsman:** A government official charged with investigating citizens' complaints against the government.

**Operating Budget:** The total budget for on-going operations.

**Operating Expenses:** Appropriation unit accounting for most non-salary costs to provide on-going services.

-P-

**Personal Services:** Appropriation unit accounting for employee salary and fringe benefit costs.

**Program Budget:** A budget whose focus is on a distinct program or service delivery rather than on classes of expenditures.

**Property Tax (Ad Valorem Tax):** A tax levied on the value of real or tangible personal property.

**Proprietary Funds:** Funds operated like a private business that charge user fees including Enterprise and Internal Service Funds.

-R-

**Referendum:** The submission of a proposed public measure to direct popular vote.

**Reserve:** Money set aside or saved for future use or a specific purpose.

**Revenue:** Financial resources received from taxes, user charges and other levels of government such as state revenue sharing.

**Revenue Bonds:** Bonded indebtedness that pledges a specific revenue source for repayment. Revenue bonds do not require voter approval under state law.

**Rolled Back Rate:** The millage rate based on the current year's taxable value, exclusive of new construction, that will raise the same number of tax dollars as the previous year.

-S-

**Special Revenue Funds:** Used to account for specific revenue sources that are legally or administratively restricted to expenditures for specific purposes. Building permit fees and gas taxes are examples of revenues accounted for in Special Revenue Funds.

**Special Master:** A Special Master is a person who meets the minimum qualifications set forth in the local jurisdiction enabling ordinance and who is

**Collier County Government**  
**Fiscal Year 2022 Adopted Budget**

authorized to hear and decide cases involving violations of local codes and ordinances.

**Strategic Planning:** A method of priority setting based on establishing short and long-term goals, objectives and implementation plans.

**-T-**

**Tax Increment Financing (TIF):** Tax increment revenues are all new property tax revenues generated by new developments or assessments, which increase the existing tax base within the designated redevelopment area.

**Tax Neutral:** A budget prepared with a General Fund Millage Rate that will raise the same amount of ad valorem revenue as the prior year adopted budget.

**Tax Roll:** The list of properties, and their values, subject to tax for the coming year.

**Tentative Budget:** The proposed budget subject to revision and final adoption by the Board of County Commissioners.

**Transfer:** Money moved from one fund to another.

**Trust Fund:** A fund used to account for assets held in a trustee capacity.

**-U-**

**Unfunded Requirement (UFR):** Description for a program, initiative or personnel request which is not recommended for funding within the proposed fiscal year budget but may receive funding consideration by the Board of County Commissioners during the budget process prior to final adoption from excess or surplus funds.

**User Fees:** Money paid for a service by the recipient of that service. Examples include utility charges, ambulance fees and parking fees.

Property is assessed as of January 1, and taxes based on these assessments are levied and become due on the following November 1. Therefore, assessments and levies applicable to a certain tax year are collected in the fiscal year ending during the next succeeding calendar year.

<sup>1</sup>The basis of assessed value required by the state is 100% of actual value including tax exemptions.

Basis for property tax rates is 1 mill per \$1,000 of assessed value. Property is assessed as of January 1 and taxes based on those assessments are levied according to the tax rate in effect that tax year and become due on November 1. Therefore, assessments and levies applicable to a certain tax year are collected in the fiscal year ending during the following calendar year.

(1) Operating revenues plus other income; certain interest income, gain on disposal of assets, capital grants and contributions and transfers in are not included.

(2) Total operating expenses, excluding depreciation and amortization; loss on disposal of assets, interest expense and transfers out are not included.

(3) Net available revenue divided by total bonded debt service requirements for the County Water and Sewer District.

(4) Special Obligation Bonds were first issued in FY-2010, debt service payments commenced in FY-2011.

(5) The revenues that comprise the legally available non-ad valorem revenues are defined by bond documents; these revenues include Sales Tax and certain impact fees.
